

eWender

First in the Industry...

*...Battery Powered, Electric
Compost Turner*

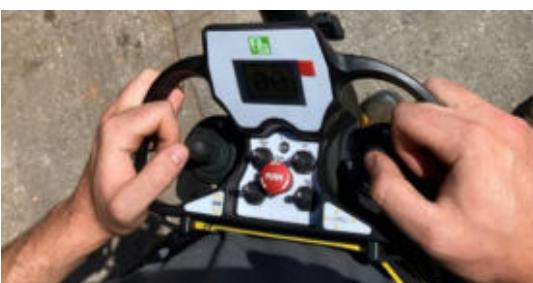

eWender E 350 and E 500

The eWender makes an important contribution to the composting of biogenic waste materials. It enables the operator to control and optimize his process while achieving the highest possible product quality. The eWender provides maximum efficiency without the need for fossil fuels.

EV Technology | Zero Emissions | Lowest Energy Costs | Clean Technology

Once the windrow has been identified, the eWender turns it without the need of operator input. When the windrow is completed, operator is notified, and the eWender automatically switches to idle mode. The eWender is then driven by operations remote control.

- Radio controlled with semi-autonomous functions
- No greenhouse gas emissions
- Complete process control
- EV Technology assures huge maintenance savings
- Unmatched Efficiency
- Traditional/Solar Charging available

Technical Data

eWender	E 350	E 500
Windrow width up to [m]	3.5	5.0
Windrow height up to [m]	1.8	2.4
Windrow cross section up to [m^2]	3.1	6.2
Surface Utilisation [m^3/m^2]	0.9	1.25
Machine-efficiency-class A⁺	0.05	0.05
[kWh/ yd^3]		
Granular size up to [mm]	200	300
Tunnel width [mm]	3,000	4,500
Tunnel height [mm]	1,800	2,300
Turning capacity up to* [m^3/h]	1,500	3,000
Drum speed [min^{-1}]	0-170	0-170
Drum diameter [mm]	1,000	1,200
Transport dimensions		
Width [mm]	2,470	2,550
Height [mm]	2,230	2,730
Length [mm]	3,930	5,430
Weight ca. [kg]	8,000	11,000

*material dependend

Effortless transporting

Rotor lifts up to 90°
